

PRODUCT INFORMATION

V6 Intercom Unit

- Full duplex, always-on communications
- Secure bluetooth connection - CSR chip using Bluetooth 2.0
- 92mm x 45mm x 15mm.
- Weight 45g
- Maximum operating range 1,200m
- Pairing range: 10m
- Maximum talktime – 7 hours
- Standby time – 120 hours
- 500mAh Li Polymer battery.
- Charge via USB connection at 5v using supplied cable to 3.5mm jack socket
- Charge time 3-6 hours
- Operating Frequency: 2.402 - 2.480GHz
- Operating temperature: -20°C to +50°C . Water-resistant
- Digital signal processor(DSP) technology for wind and whistle noise cancellation
- Fitted with either a belt loop or belt clip at users request (see next page)

V4 Intercom Unit

- As above, but with dual channel bluetooth connection

Acoustic airtube earpiece

- Connectivity: 3.5 mm Jack
- Microphone Type: Omni Directional
- Includes 2x clothing clip
- Weight: 31 g

Belt loops (left) or belt clips

- Clips will work over a belt or hem of a skirt whilst the belt loops will only work with a belt of less than 2" width.
- The belt loop is more secure and less likely to become dislodged during a game, however, as the units weigh only 45g, this should not cause the cable connection to be broken.
- Loops or clips are glued to the rear of the Interphone with tape to strengthen the bond. In the event that they work loose, these should be re-fixed with gel-based superglue
